Current focus

Henners is focused on music-led ecstatic dance journeys for conscious floors, ceremonies, retreats, festivals, and community rooms. The work is rooted in listening: to the music, to the room, and to what the moment asks for.

Audio, setup, and support

Audio equipment

- Professional sound system appropriate for full-range dance music.
- Pioneer DJM-900NXS2 mixer or newer.
- Three Pioneer CDJ-3000 players, or CDJ-2000NXS2 where agreed.
- Linked players with required LAN cables/switch.
- Stereo booth monitors with independent level control.

Technical support

- Sound engineer or stage/FOH contact available before and during the set.
- All equipment tested before arrival.
- Enough setup time for linking players, checking USBs, and a calm soundcheck.

Setup timing

- Allow roughly 30 minutes for setup and soundcheck.
- Please confirm DJ booth position, changeover flow, and who handles final sound approval.

Hospitality

- Water, tea, fruit, and a clean towel in or near the booth.
- A grounded, low-stress arrival helps protect the musical arc of the session.

Questions or alternatives

If the venue has a different setup, send details through the contact form before the event: <https://dj.srenneh.com/#contact>.
